ESMAIL ELTURKY

Senior Front-End Developer — Angular · React · Next.js

Alexandria, Egypt | 01016396028 | en.esmailelturky@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Senior Front-end developer with 5+ years of experience building large-scale, role-based web applications, primarily with Angular, and hands-on experience with React and Next.js. Skilled at translating complex requirements into intuitive, high-performing user interfaces, with a strong focus on UI/UX, clean architecture, and reusable component design.

Proven track record delivering reusable UI libraries, dynamic form builders, real-time systems, and payment workflows for enterprise and government clients. Committed to SOLID principles, clean code, and continuous learning across modern front-end ecosystems.

Portfolio: esmailelturky.github.io/portfolio

SKILLS

Frameworks & Libraries: Angular, React, Next.js, RxJS, NgRx, Redux
Languages: TypeScript, JavaScript, Python
UI & Styling: HTML, CSS, Sass, Bootstrap, Angular Material, Ant Design, PrimeNG
Architecture & Practices: OOP, Domain-Driven Design, SOLID Principles, Micro-Frontends, Unit Testing
Tools: Storybook (Book-Story), Git, SignalR/WebSockets

WORK HISTORY

Senior Front-End Developer (Remote) — Youxel Technology *09/2023 – Present*

- Spearheaded development of large-scale, role-based web applications, including the Survey Project, Form Builder Package, and Inspection Project, ensuring security, scalability, and optimal user experience.
- Built a comprehensive library of shared controls and directives for reactive and template-driven forms, promoting rapid development and consistent UI standards.
- Collaborated cross-functionally to design and implement a robust payment module, delivering a seamless and reliable payment workflow.
- Integrated SignalR for real-time multi-session handling, supporting offline scenarios and resilient WebSocket communication.
- Applied SOLID principles and clean code practices, enhancing code quality, maintainability, and scalability.
- Documented systems using Storybook and established a unit testing framework to strengthen application reliability.

Senior Front-End Developer (Project-Based Contract) — York Towers *07/2026 – 10/2026*

Dwelleo — real estate platform built with Next.js, TypeScript, and Claude Design

- Improved search engine visibility (SEO) with server-side rendered property, project, and listing pages. Added dynamic SEO metadata, structured JSON-LD data, a sitemap and robots.txt, and Google Tag Manager and Analytics integration.
- Built the property search and filtering system: modular filters, pagination, map-based browsing with ROI and market data.
- Organized and refactored the codebase into reusable shared components and typed models. Added server-side lookup caching to fix performance issues, and made the whole app work in Arabic and English (RTL/LTR) and in light and dark mode.
- Delivered core product features end to end: a multi-step add/edit property flow with validation, AI price prediction and investment scoring, an AI sales-agent dashboard, subscriptions and payments, and Nafath identity verification.

Product: Dwelleo

Senior Front-End Developer (Remote, Part-Time) — Alternatives *09/2025 – 04/2026*

- Built a multi-role club management and booking system for administrators, staff, and customers, including booking calendars, workflow automation, and multi-gateway online payments.
- Designed and implemented a reusable UI Kit, first adopted in this large-scale application, improving design consistency and development efficiency across the system.

Front-End Developer (Remote, Part-Time) — Data Boat *03/2024 – 04/2025*

- Led architectural design for web applications supporting the Ministry of Education, creating scalable modules for students, private universities, and other stakeholders.
- Designed and implemented a dynamic form builder enabling flexible, user-driven content generation without hardcoded changes.
- Built a shared, highly customizable NGX Table component reused across multiple application modules.
- Supported major governmental projects, including systems for the Ministry of Justice and the National Museum of Oman.

Full Stack Developer (Remote) — Elham *12/2021 – 09/2023*

- Drove front-end development for large-scale applications using micro-frontend architecture and domain-driven design, ensuring modular and maintainable systems.
- Implemented advanced Angular features with NgRx for state management, improving performance and maintainability.
- Designed and launched a role-based dashboard system using NG-ZORRO, RxJS, and NgRx for a high-performing admin interface.
- Led development of a back-office platform with Google SSO authentication and multi-server communication channels.
- Maintained and enhanced a monolithic Django/DRF application with a focus on scalability and clean architecture.

Demo: Elham LXP

Front-End Developer (Remote, Freelance) — Sakina *02/2021 – 12/2021*

- Designed and built a full dashboard from the ground up for a tourism company's web application.
- Evaluated and selected a UI library tailored to project needs, optimizing for usability and performance.
- Structured the dashboard using a SOLID, component-based architecture, supporting long-term feature expansion.
- Contributed to the main tourism website, ensuring seamless integration with internal management tools.
